MANUAL

OF THE

CORPORATION

OF

THE CITY OF NEW YORK,

FOR THE YEARS

1843 & 4.

BY D. T. VALENTINE.

Wm. C. Bryant, Printer,
23 & 25 Pine street, New York.

Entered according to an Act of Congress, in the year one thousand eight hundred and forty three, by DAVID T. VALENTINE, in the Clerk's Office of the Southern District of New York.

PREFACE.

It will be perceived, on an examination of the Manual, now presented, that many alterations have been made in its arrangement, differing materially from the two previous editions, and it is confidently believed they will meet with the approbation of all who are interested in its perusal. Much new matter has also been selected, never before published in any work of this character, which will not only be useful to the Municipal authorities and their officers, but to every class of our citizens.

It would have afforded the Compiler great pleasure if he could have succeeded in having this number published at an earlier period, but it will be readily observed that it is a work requiring a vast deal of labor in its compilation, and great care in its supervision, in order that it may be relied on as a book of reference.

He believes that this volume is as near correct as it is possible to be effected.

AN ACT

TO AMEND THE

CHARTER

OF THE

CITY OF NEW YORK.

PASSED APRIL 7, 1830.—CH. 122.

The People of the State of New York, represented in Senate and Assembly, do enact as follows :—

1. The legislative power of the Corporation of the City of New York, shall be vested in a Board of Aldermen, and a Board of Assistants, who together shall form the Common Council of the City.

2. Each Ward of the City shall be entitled to elect one person to be denominated the Alderman of the Ward, and the persons so chosen, together shall form the Board of Aldermen; and each Ward shall also be entitled to elect one person to be denominated an Assistant Alderman; and the persons so chosen, together shall form the Board of Assistants.

3. The Aldermen and Assistant Aldermen shall be chosen for one year; and no person shall be eligible to either office, who shall not at the time of his election, be a resident of the Ward for which he is chosen.

4. The annual election for Charter Officers shall commence

on the second Tuesday in April, and the Officers elected shall be sworn into office on the second Tuesday in May thereafter; and all the provisions of law now in force in regard to the notification, duration and conduct of elections for Members of Assembly, and in regard to the appointment, powers and duties of the inspectors, holding the same, shall apply to the annual election of Charter Officers.

5. The first election for Charter Officers, after the passage of this law, shall take place on the second Tuesday in April, one thousand eight hundred and thirty-one; and all those persons who shall have been elected under the former laws regulating the election of Charter Officers, and shall be in office at the time of the passage of this law shall continue in office until the officers elected under this law shall be entitled to be sworn into office.

6. The Board of Aldermen shall have power to direct a special election to be held, to supply the place of any Alderman whose seat shall become vacant by death, removal from the city, resignation, or otherwise; and the Board of Assistants shall also have power to direct a special election to supply any vacancy that may occur in the Board of Assistants; and in both cases, the person elected to supply the vacancy, shall hold his seat only for the residue of the term of office of his immediate predecessor.

7. The Boards shall meet in separate chambers, and a majority of each shall be a quorum to do business. Each board shall appoint a President from its own body, and shall also choose its Clerk and other officers, determine the rules of its own proceedings, and be the judge of the qualifications of its own members. Each board shall keep a journal of its proceedings, and the doors of each shall be kept open, except when the public welfare shall require secrecy; and all resolutions and reports of Committees which shall recommend any specific improvement involving the appropriation of public monies, or taxing or assessing the citizens of said city, shall be published immediately after the adjournment of the board, under the authority of the Common Council, in all the newspapers employed by the Corporation: and whenever a vote is taken in relation thereto, the ayes and noes shall be called and published in the same manner.

8. Each board shall have the authority to compel the attendance of absent members; to punish its members for disorderly behavior, and to expel a member, with the concurrence of two-thirds of the members elected to the board; and the member so

expelled, shall, by such expulsion, forfeit all his right and powers as an Alderman or Assistant Alderman.

9. The stated and occasional meetings of each board of the Common Council, shall be regulated by its own ordinances; and both boards may meet on the same or on different days, as they may severally judge expedient.

10. Any law, ordinance, or resolution of the Common Council may originate in either board, and when it shall have passed one board, may be rejected or amended by the other.

11. No member of either board shall, during the period for which he was elected, be appointed to, or be competent to hold any office, of which the emoluments are paid from the city treasury, or by fees, directed to be paid by any ordinance or act of the Common Council, or be directly or indirectly interested in any contract, the expenses or consideration whereof are to be paid under any ordinance of the Common Council; but this section shall not be construed to deprive any Alderman or Assistant of any emoluments or fees which he is entitled to by virtue of his office

12. Every act, ordinance, or resolution, which shall have passed the two boards of the Common Council, before it shall take effect, shall be presented, duly certified, to the Mayor of the city, for his approbation. If he approve, he shall sign it; if not, he shall return it with his objections, to the board in which it originated, within ten days thereafter; or if such board be not then in session, at its next stated meeting. The board to which it shall be returned, shall enter the objections at large on their journal, and cause the same to be published in one or more of the public newspapers of the city.

13. The board to which such act, ordinance, or resolution, have been so returned, shall after the expiration of not less than ten days thereafter, proceed to re-consider the same. If after such re-consideration, a majority of the members elected to the board shall agree to pass the same, it shall be sent, together with the objections, to the other board, by which it shall be likewise re-considered; and if approved by a majority of all the members elected to such board, it shall take effect as an act or law of the Corporation. In all such cases the votes of both boards shall be determined by yeas and nays, and the names of the persons voting for and against the passage of the measure re-considered, shall be entered on the journal of each board respectively.

14. If the Mayor shall not return any act, ordinance or resolution so presented to him, within the time above limited for

that purpose, it shall take effect in the same manner as if he had signed it.

15. Neither the Mayor nor Recorder, of the city of New York, shall be a member of the Common Council thereof, after the second Tuesday of May, one thousand eight hundred and thirty-one.

16. Whenever there shall be a vacancy in the office of Mayor, and whenever the Mayor shall be absent from the city, or be prevented by sickness, or any other cause, from attending to the duties of his office, the President of the board of Aldermen shall act as Mayor, and shall possess all the rights and powers of the Mayor, during the continuance of such vacancy, absence or disability.

17. It shall be the duty of the Mayor,

First. To communicate to the Common Council, at least once a year, and oftener if he shall deem it expedient, a general statement of the situation and condition of the city, in relation to its government, finances and improvements.

Second. To recommend to the adoption of the Common Council all such measures connected with the police, security, health, cleanliness, and ornament of the city, and the improvement of its government, and finances, as he shall deem expedient.

Third. To be vigilant and active in causing the laws and ordinances of the government of the city to be duly executed and enforced.

Fourth. To exercise a constant supervision and control over the conduct and acts of all subordinate officers, and to receive and examine into all such complaints as may be preferred against any of them for violation or neglect of duty, and generally to perform all such duties as may be prescribed to him by the charter and city ordinances, and the laws of this State and the United States.

18. Annual and occasional appropriations shall be made by proper ordinances of the Common Council for every branch and object of city expenditure, nor shall any money be drawn from the city treasury except the same shall have been previously appropriated to the purpose for which it was drawn.

19. The Common Council shall not have authority to borrow any sums of money whatever on the credit of the corporation, except in anticipation of the revenue of the year in which such loan shall be made, unless authorized by a special act of the legislature.

20. FINANCIAL CONDITION OF THE CITY.

The financial condition of the city on the 1st May, 1841, was as follows, as will be seen by the Mayor's Message, from which the following statement is taken—

"I have requested from the Comptroller and received a statement of the City Debt up to the 1st of May last, from which the following appears:

New York City Stocks of 1820 and '29..	$500,000	
Less amount held by the Commissioners of Sinking Fund.....	91,200	
		$408,800
Public Building Stock.....	$515,000	
Less amount held by the Commissioners of Sinking Fund.....	15,000	
		500,000
Fire Loan Stock, a contingent liability,..	$882,000	
Less an equal amount of bonds and mortgages owned by the Commissioners of Sinking Fund.....	882,000	
		000,000
Fire Indemnity Stock.....	$358,900	
Less amount held by the Commissioners of Sinking Fund.....	122,700	
		236,200
Floating Debt Stock.....	$350,000	
Less amount held by the Commissioners of Sinking Fund.....	168,210	
		181,790
Corporation Bonds—a contingent debt...	$585,000	
Less an equal amount of liens on real estate.....	585,000	
		000,000
Water Stocks.....	$7,949,377	
Less amount held by the Commissioners of Sinking Fund.....	298,000	
		7,651,377
		$8,978,167

The City Stocks which will be held by the Commissioners of the Sinking Fund at the close of the present fiscal year, will be sufficient to cover, and in effect cancel the stock of 1820 and '29, and the Public Building Stock. The Fire Loan Stock and Corporation Bonds are contingent liabilities of the city, for which bonds and mortgages, and other real estate liens, are held by the Commissioners of the Sinking Fund, which can be realized and applied to the liquidation of the debt at any time. These, therefore, may be properly considered as no part of the city debt, but rather as a loan of its credit on full and perfect securities.

The Fire Indemnity Stock is, for the most part, payable in twenty-seven years; the provision for its redemption is an annual tax of $25,000 to be levied upon the real and personal estate of the citizens, one-half of which tax would, however, accomplish its redemption in the time fixed.

The Floating Debt Stock is payable at the rate of $50,000 per annum, to meet which, a tax of the like sum is annually to be imposed.

It will be seen, therefore, that the principal of all the stocks here mentioned, (and which constitute the entire debt of the city, except that for the construction of the Croton Aqueduct,) is fully provided for, and capable of being redeemed without resort to the revenues of the Sinking Fund after the present year; or, in other words, the proper income of the Sinking Fund, on and after May next, when the Croton Water will be introduced, will be applicable, solely, to the cancelling of the Water Stocks.

The Water debt, as estimated, will reach $12,000,000. It is computed that the income of the Sinking Fund, as at present constituted, will alone be sufficient to meet and cancel it in forty years. It is to be remembered, too, that the Sinking Fund will, long before that period, be greatly enlarged from the avail of such real estate as the Corporation may sell from time to time."

FINANCIAL CONDITION OF THE CITY—1842.

The financial condition of the city on the 7th of May, 1842, was as follows, as will be seen by the Comptroller's Report to the Board of Aldermen, [see Document No. 84,] from which the following statement is taken.

CITY DEBT, MAY 7, 1842.

New York City Fives, of 1820 and 1829	$500,000
Public Building Stock	515,000
Fire Loan Stock	525,000

Extract from the Comptroller's Report, (1841.)

"The provisions already established by law for the payment of this Debt, are ample; the faith and *property* of the City are pledged for the redemption of the Water Debt, as well as for the other Stocks of the City; these latter are already secured by active means on hand; the payment of the Water Stock is distributed through a period of forty years; the Sinking Fund, established to redeem the old Stocks, is continued and made applicable to the Water Stocks, by repeated enactments of both the State and City Governments. This fund alone, without resort to the property of the Corporation, is capable of redeeming the Debt within that period; its minimum revenue of $200,000, would alone yield in the forty years $8,000,000, and the compounding through that time would increase it $4,000,000 more."

FINANCIAL CONDITION OF THE CITY—1843.

The financial condition of the city on the 20th of May, 1843, is set forth in the Mayor's annual message to the Common Council, as follows:

The absolute city debt, both permanent and temporary, as measured by its stocks, bonds and checks, outstanding on the 20th inst., was $13,697,323 33. This sum, however, includes a nominal debt to the Commissioners of the Sinking Fund as holders of its stocks to the amount of $965,805. With this proper deduction the whole absolute debt may be stated at $12,731,518 33, composed of the following items:

New York City Stock of 1820 and 1829..	$500,000	
Less amount held by Commissioners of Sinking Fund.....	95,400	
		$404,600 00
Public Building Stock.....	515,000	
Less amount held by Commissioners of Sinking Fund.....	15,000	
		500,000 00
Fire Indemnity Stock.....	375,088	
Less amount held by Commissioners of Sinking Fund.....	139,188	
		235,900 00
Floating Debt Stock.....	250,000	
Less amount held by Commissioners of Sinking Fund.....	100,000	
		150,000 00
Water Loan Stocks.....	11,974,841	
Less amount held by Commissioners of Sinking Fund.....	616,217	
		11,358,624 00
Warrants of Checks outstanding.....		82,394 33
		$12,731,518 33

In addition to the above, other certificates of stocks and bonds have been issued, under the authority of the Corporation, to the amount of $710,162 64, which may properly be regarded a contingent liabilily, and for which the city is indemnified by

absolute liens on real estate situate in this country. This contingent debt consists of the following items :

Fire Loan Stock.....	$525,000	
Less City Stocks held by Commissioners of Sink Fund.....	184,780	
		$340,220 00
Assessment Bonds.....		200,000 00
Revenue Bonds.....		169,962 24
		$710,162 24

The provisions for the payment of the above debt are stated in the exhibit for the preceding year. See page —.

The following is an extract from a communication of the Comptroller made to the Board of Aldermen, July 31, 1843.

An examination of the schedules will shew that the Real Estate of the City, including the Croton Water Works, is estimated at $23,627,810 70, and produces a yearly rental of $313,746 80; about $55,000 of which is pledged to and paid into the Sinking Fund, by ordinace of 1813 to reduce the principal of the City Debt, (which this day amounts to $12,854,552 00,) and the balance is paid into the Treasury to meet, in part, the interest of the Debt, according to the Act of June 8, 1812, which pledges the whole of the revenues of the Corporation for that purpose.

Extract from the Report of the Commissioner of the Alms House, made to Board of Ald, July 24, 1843.

In the Alms House proper there are 1,032 men, 948 women.

In the Alms House Hospital, 146 men, 166 women.

On the Long Island Nurseries, 2 men, 435 boys, 174 girls.

In the Lunatic Asylum, 153 men, 183 women.

In the Penitentiary, 109 white male convicts, and 41 colored male convicts—making th ewhole number of male convicts, 150

There are in the Penitentiary 156 white males, and 21 colored males, committed as vagrants—making the whole number of male vagrants 177, or an excess of 27 male vagrants over male convicts.

The number of female convicts in the Penitentiary is as follows:

18 whites, 3 colored; or 21 female convicts altogether.

Of females committed as vagrants to the Penitentiary, there are 334 whites, and 39 blacks--making the whole number of female vagrants 373.

The excess of female vagrants over female convicts in the Penitentiary is 372, showing the following astounding fact:

That seventeen females, innocent of any felony, are committed to the Penitentiary, there to associate with felons of their own sex, and be exposed to all the influences of evil example and companionship, to one who has been indicted, convicted and sentenced for the perpetration of a crime cognizable by our Courts of Justice.

In the City Prison, there are now confined 87 white males, and 12 colored males; making the total of male prisoners 99.

There are also there confined 34 white females, and 14 colored females; making the whole number of female prisoners 48.

At the present time there are also at nurse 285 children.

The whole nuuber of persons under the charge of, and supported by this Department, is 4,665, in the several institutions, and including children at nurse.

The whole number of persons supported by the Department in the month of July last, was 3,381, excluding children at nurse, or 979 less than the number now supported by the Department, also excluding children at nurse.

This increase in the number of paupers and others, supported by public charity, necessarily increase our current expenses greatly. And to this fact the attention of the Common Council is particularly directed.

To the expenses thus occasioned, there must be added the amount paid to families receiving outdoor relief, which for the month of April last, amounted to $2,246; the amount expended for that purpose in April, 1842, being $764 26. The number of families receiving outdoor relief in 1840, was 4,150, and has since greatly increased. The undersigned since their appointment to office, have in some measure reduced the expenditure under this head of account, and will endeavor to reduce it still further.

The number of children from Long Island Farms, under indenture at the present time, is 1,301. These children are also to some extent under the supervision of this Department.

* The Deaths reported from Intemperance cannot be relied on as the whole truth, because many deaths of which Intemperance has been the principal cause, are returned under other causes, mostly apoplexy and consumption. As reported, however, the number of deaths in the last few years, in proportion to the population, exhibits a gratifying decrease. The average proportion of deaths to population in 1835, was 1 to 4,087.

The Compiler is indebted to the politeness of Doctor J. W. Francis, late Resident Physician of this city, for the following extract, which is from his pen, taken from the new and improved "History and Topography of the United States. Edited by JOHN HOWARD HINTON, A. M., with additions and corrections, by SAMUEL L. KNAPP:"

The City of New York may be classed among the most healthy of its size in the world. As no register of births, however, is preserved, one important item is wanting in estimating its comparative salubrity. Its apparent average mortality, greater than some of its sister cities, is to be referred to the number of emigrants who resort to this great emporium. The characteristic feature of a large proportion of the most prevalent disorders is inflammatory; hence the outlet of human life by pulmonary consumption; and the number of stillborn cases is supposed to have much increased of late years by the injudicious use of the secale cornutum or ergot. The deaths from the drinking of cold water in some summers of great solar heat, serves to enlarge bills of mortality. This was particularly the case in the ardent season of 1825, and in that of 1834. The yellow fever has been less frequent in its occurrence than formerly. This, by some, is attributed to the improved state of our domestic policy, and by others to a more judicious system of quarantine

regulations. The first record of this formidable disorder is that of its appearance in New York in 1702, under the name of the great mortality: it was considered by Smith, the historian, as having been brought from the West Indies. It appeared again in 1742, according to Colden, and some notice was given by Adoms of its ravages in this city again in 1791. The visitations of this disease have been since 1795, in the years 1797, 1798, 1801, 1803, 1805, 1819, and 1822. The controversy involving the specific character and contagious and non-contagious nature of this disease, has elicited much talent from the faculty on both sides of the question, though not without occasionally betraying too much asperity. The most ample accounts of this fever are those by Bayley, Miller, and Hosack, and that of the disease of 1822 by P. S. Townsend, M. D. In 1832, the cholera asphyxia, or Asiatic cholera, appeared in the city of New York. The disorder exhibited a train of formidable symptoms novel to nearly all who encountered it; and was regarded as a nova pestis by most of the experienced and enlightened prescribers. Nearly five thousand of the inhabitants fell victims to it, notwithstanding the intrepidity with which it was combated, and now at this present writing (August, 1834) the same pestilence, characterized by the same venom, is again prevalent. The number of its cases is, however, few, compared with that of the season of 1832.

The average temperature of New York throughout the year is stated at 55 deg. of Fahrenheit. In winter, the thermometer is rarely lower than 15 deg. or 20 deg. below the freezing point; sometimes the mercury falls to zero, and it has been observed at two, three, four or six degrees below it. Most unquestionably the nearness of the Atlantic and the Gulf Stream conduce to abate the severity of the winter. Snow is not of frequent occur-

rence, and rarely continues on the ground more than ten or twelve days at a time. The winter closes about the 10th or 15th of March. The temperature of the summer is rarely higher than 80 deg. or 84 deg.; there are a few days in which the thermometer ranges between 90 deg. and 96 deg., but this heat is of short continuance, as the evening sea breezes cause a great abatement of it at night. There are not a few sudden changes in temperature both in summer and winter. The greatest change yet noticed in New York took place in August, 1809, when by the sudden coming on of a northwest storm of rain, the thermometer evinced a difference of forty degrees within the course of fifty-six minutes. But this is no fair sample of the general character of the sudden vicissitudes of the weather. The prevailing winds in summer are from the south and southwest; in winter, from the north, and northeast, and northwest.

The annual average of deaths is stated, by Villerme, at Paris as 1 to 32 6-20ths. In London it has been put down as 1 to 38 or 40; in Glasgow as 1 to 44. The annual mortality at Naples is reported as 1 to 28¼. In the whole United States it has been published as 1 to 40. In the healthiest districts of the United States as 1 to 56; and in the most unhealthy as 1 to 35. This calculation is not probably so favorable as a more accurate examination of facts would authorize. In New York, it may be set down as one to 39½. Notwithstanding the speculations of many ingenious writers, as Williamson, Volney, Neist, &c., there is not much reason to suppose that our seasons have become much milder, or are in any particular manner ameliorated; and the recent elaborate investigation of Arago seems to render such a flattering speculation altogether hypothetical.

This assertion seems corroborated by the various accounts that have been published of the weather during

the winter of 1831-2, in various parts of the United States. According to some, this winter has been colder than ever before within the memory of man. In Georgia and Tennessee, the mercury was at zero; in Washington, 5 or 6 deg. below, and in Augusta, Maine, 26 deg. below zero. The City of New York also furnished repeated examples of severe cold during the same season. Similar observations are justifiable of the season of 1833-4.

INSTITUTION FOR THE INSTRUCTION OF THE DEAF AND DUMB.

The New-York Institution for the Instruction of the Deaf and Dumb, was incorporated by an act of the Legislature of the State of New York, passed on the 15th of April, 1817. The institution went into operation, under its charter, in the spring of the following year.

Buildings and Situation.—The buildings occupied for the purposes of the institution, are situated in the Twelfth Ward of the city of New York, on a gentle eminence, three and a half miles from the City Hall. The ground occupied by the main building, with that adjacent, to the extent of one acre, is the property of the institution. In addition to this, nine acres are held by lease from the city Corporation, of which a part is under cultivation, and a part constitutes an extensive lawn, immediately in front of the building, where the male pupils amuse themselves, at proper hours, in athletic sports. The whole taken together, extends along Fiftieth street, from the Fourth avenue, on which is constructed the New York and Harlem Railroad, to the Fifth.

The main building, in the dimensions of its ground plan, is one hundred and ten feet by ninety. In elevation, it embraces five stories, including the basement, and is surmounted by a square tower or observatory, commanding an extensive and beautiful prospect.

Besides the principal building, in which the pupils with their instructors reside, there is another, containing tools and accommodations for the practice of manual labor, in the attainment of certain selected mechanic arts. This building is of three stories, and, with the wings, is one hundred and forty feet in length by twenty-five in breadth.

There is a choice offered to the pupils or their friends, between five occupations, viz: bookbinding, cabinet-making, tailoring, shoemaking, and gardening. The male pupils are engaged in some one of these occupations about four hours daily, under the superintendence of skilful workmen. All the female pupils are taught to perform the lighter household duties and plain sewing; and those whose parents desire it, are instructed in dress-making and tailoring.

THE GOVERNMENT of the institution is that of a well-ordered family. The principal is regarded as a parent; and this title is not unfrequently applied to him, spontaneously, by the pupils. The immediate administration of government over the males, is committed to the instructors in succession. The government of the females, when not occupied in the school room, belongs to the matron. The whole system of government is subject to the constant oversight of the Principal.

The number of pupils resident in the institution is one hundred and sixty-two, who are supported as follows;

DOCUMENT I.

REPORT OF THE COMMITTEE ON INSTRUCTION.

To the Managers of the New York Institution for the Blind:

The Committee of Instruction respectfully report:

That the schools of the Institution have been conducted during the past year very much to their satisfaction—the male pupils being under the charge of Mr. Chamberlain, the females under that of Miss St. George.

The course of instruction is substantially the same as that pursued in former years, and is shown in detail in the annexed reports received from the Superintendent. The pupils of the Institution are most faithfully and thoroughly educated in the branches in which they receive instruction. No one can attend the examinations or converse with the pupils without being convinced of this. As some slight illustration of the truth of this remark, the committee append to this report some specimens of the compositions of the pupils. These are contributions written for a manuscript periodical composed entirely by the pupils, which is conducted under the supervision of Mr. Chamberlain, and is regularly read to the pupils. This furnishes a most excellent exercise for the pupils, and affords them much entertainment.

These contributions are entirely the work of the pupils, without aid from any quarter. They are written down by themselves, and the following are mere transcripts from their original manuscripts.

It should be remembered, that though their want of sight does not prevent the blind being taught to write, yet it entirely precludes the possibility of their correcting what they have once written; each sentence must therefore be wholly elaborated before it is committed to paper.

It will be observed that many ideas are contained in these compositions, which a blind person could never have acquired for himself: these are derived from conversation with seeing persons and from the books they read and hear read. The same character is exhibited in their conversation, and one is surprised on his first acquaintance with them to find how fully they adopt expressions and figures founded entirely upon the operations of the organs of sight.

The annexed statement gives detailed information con-

cerning the department of instruction during the past year.

All of which is respectfully submitted.

February, 1843.

GEORGE F. ALLEN,
EDWARD JONES,
A. R. WALSH,

United States City Despatch Post.

POST OFFICE, NEW YORK.

All Letters placed in the Boxes at the various Stations, together with all City Letters deposited either in the Post Office or in the Branch Post Office, will be under the charge of the Department, and will be received for rapid delivery at the hours mentioned below.

Letters addressed to parties renting Boxes at the Upper and Lower Post Office, will be deposited in them as heretofore, unless a request is made that they be sent by the City Despatch Post.

STATIONS.

Letter Boxes are placed at one hundred Stations in various parts of the City, and letters deposited therein, will be punctually delivered three times a day, (Sundays excepted,) at three cents each; option being given, either to free the letters in the manner shown in the following regulations, or leave the postage to be collected of the party to whom the letter is addressed.

POST-PAID LETTERS.

Letters, which the writers desire to send free, must have a free stamp affixed to them. An ornamental stamp has been prepared for that purpose, and may be procured at either of the Post-Offices and all the Stations. The charge will be 37 cents per dozen or $2 50 per hundred: the reduction of price for the larger quantity being made with a view to the accommodation of those parties sending a considerable number of circulars, accounts, &c.

All Letters intended to be sent forward to the General Post-Office for the Inland Mails, must have a free stamp affixed to them.

UNPAID LETTERS.

Letters not having a free stamp, will be charged three cents, payable by the party to whom they are addressed, on delivery.

Letters and newspapers addressed to the editors of the public press, will be delivered free.

REGISTRY.

NO MONEY MUST BE PUT INTO THE BOXES,

unless registered at the Upper Post Office, where a Registry will be kept for Letters, which parties may wish to place under special charge. Free stamps must be affixed to such letters for the ordinary postage, and an additional free stamp must be affixed for the registration; but all such letters must be speedily deposited at the principal office.

The advantages offered by this plan are,

First. The secure and prompt transmission of all registered letters containing any special notice or matter by which means legal evidence may be obtained of the due delivery of the same; and the immediate despatch of any letter or small package requiring instant delivery.

Secondly.
